PSC600-series DC/DC 300 - 800 W

The PSC600 series convection cooled DC/DC converters has a wide range of input and output combinations. The basic mechanical design is based around the Euro format 6HE 230 mm depth with two DIN 41612 H15 connectors. However we have three mechanical versions; the N-Mechanics with 2 x H15 connectors for in and output and N-M6 mechanics with M6 Screw/Studs, those have also a separate alarm connector. The third mechanic is the L-mechanics with 2 x H15 connectors for plugin into a Euro sub rack 6HE. The alarm is moved to the output connector. All versions can accommodate up to two extra heat sinks to supply higher power or provide higher operating temperatures (e.g. EN 50155 T3). The input and output can also be supplied circular connectors for Military applications with high demands on EMC immunity and also up to IP65 ingress classification. Very high practical MTBF and CE marked as free standing unit.

INPUT / OUTPUT

- Optimized input voltage from 24 to 440 V nominal battery voltages.
- Single outputs from 5 to 125 V.
- Zero Inrush current limit.
- Reverse input voltage protection

FEATURES

- Conformally coating, tropic.
- Alarm relay output.
- Accessible on front:
 - Output voltage adjustment
 - Output voltage measurement
 - Output OK status green LED

INPUT AND OUTPUT RATINGS

INPUT			
Nominal inputs	Input range	Stop level	Code
24 Vd.c.	20 - 32 V	< 16.8 Vd.c.	24
48 Vd.c.	41 - 60 V	< 33.6 Vd.c.	48
110, 127 Vd.c.	93 - 150 V	< 77 Vd.c.	110
220, 250 Vd.c.	187 - 300 V	< 154 Vd.c.	220
440 Vd.c.	350 - 550 V	< 330 Vd.c.	440

Other input ranges on demand.

Input range, is the range we guaranty

full output performance, $U_{out} + 10\%$ $I_{out} + 5\%$.

The converter works down to the stop level.

The output voltage might decrease to approx -10% of nominal output voltage at the stop level.

OPERATION

- High efficiency > 90%.
- Operating temperature range -25 to +70 °C with no derating.
- Fully encapsulated, meets IP20 as standard.
- Convection cooled.

EMC

- EN 61000-6-3, Emission.
- EN 61000-6-2, Immunity.
- EN IEC 61000-4-4, 4 kV.
- EN IEC 61000-4-5 level 2 & 3.

OUTPUT

FEATURES

Over voltage protection OVL

A second independent regulation circuits limits the output voltage to 15% over nominal output voltage, in case the normal regulation fails.

Under voltage alarm

A built in alarm changes to alarm state if the converter output voltage drops 10% below nominal output. The DC OK LED is also controlled by the alarm circuit.

The alarm has an relay output with both [NO] and [NC] function. The relay rating is 30V 1A (a.c. & d.c.)

Reverse input voltage protection

On input code 24 and 48 the reverse voltage protection is provided by a parallel diode. This diode is only intended to blow an external input fuse.

On input code 110 and above the reverse voltage protection is provided by a series diode. The converter will never start.

Inrush current limit

On input code 110 and above the inrush limit circuit is always active thus acting at voltage dips below the stop level >10 ms. On input code 24 and 48 this function is optional.

Adjustment & measurement

Output voltage adjustment potentiometer and output voltage measurement points are accessible from the front panel.

Conformal coating

The PSC-series is conformally coated to withstand non-condensing tropical environment.

OPTIONAL FEATURES

Wider input range

The PSC600 series can be supplied with wide input range to meet train or mobile application demands.

Built in series diode - C

Series diode on the output, which is mounted inside the case. Use this option when the output is connected in parallel with other power supply to achieve redundancy.

Built in series diode with resistor - CR

The CR option automatically balance the load between 2 or more paralleled PSC600 units. Used in hotswap.

Remote Sense - S

The voltage sensing can be put at the load to compensate for voltage drop.

The sense circuit is a standard feature on 5 V outputs.

Inrush current limit

On input code 24 and 48 the inrush limit circuit is optional. This option affects the input voltage range. The circuit is always active thus acting at voltage dips below the stop level >10 ms.

Higher Insulation on output - E2

E2 - Output/case 2.5 kVa.c. for 12 to 125 Vd.c.

-40°C ambient temperature

Over Current Shut Down - OCSD

The PSC600 series can provide over current during a limited time. The OCSD circuit shut down the unit when a preset time has passed. This delay can be pre-set between 100 ms to 3 seconds.

N-MECHANICS: WALL & CHASSIS MOUNTING WITH H15 CONNECTORS

The standard version of PSC600 series is this N-mechanics, which includes H15 connector holder and 2 x H-15-T female connector, see page 3. Next page shows PSC600 series with M6 screws that is an optional connection method using the same basic mechanics. The basic case can be added with one or two extra heat sinks. Depending on output power or options. Its also possible to mount against a larger heat sink, by using spacers. The spacers also fix the H15 connector. Optionally TS-35 DIN mounting clips can be provided.

The PSC600-family are built in aluminium extrusion, with high thermal conductance which also work as a good EMC shield. The mechanical design permits use in vehicles and heavy industrial environments. The IP class is IP20.

Vibration and shock/bump are based on IEC 60721-3-5 Ground vehicle installations Class 5M2 with random vibration according to IEC 60068-2-64 and bump IEC 60068-2-27:2008 which are 3 dimensional tests.

The vibration test has a 1.68 gRMS value during a certain time. In trains its 5 h according to EN IEC 61373. The bump is tested at 30 g, 6 ms. The PSC600 series has also been tested in military vehicles.

Military grade version of PSC600 series is shown on Picture 6, page 8. Depends on the customer requirement to be mentioned:

Input: MIL-STD 1275E; MIL-STD 1399-390

EMC: MIL-STD 461F RS-103 up to 200 V/m

Environment: MIL-STD 801 (customer specification); IP54/IP65

N-M6 MECHANICS: M6 SCREW / STUDS CONNECTORS

The PSC600 family with N-M6 mechanics using M6 screws. The standard version has separated Combicon connectors for remote sense, see option S, and NO, NC relay function. The unit is also supplied with a Polycarbonate electric touch safety cover. For higher Ingression Protection IP rating we use panels that are fully covered (except the connectors) without Sense and Alarm connectors.

SAFETY AND EMC

PSC-series meets the requirements defined by CE mark as apparatus. PSC-series meets requirements of EMC directive and low voltage directive (LVD) and RoHS II directive.

Thus a PSC-series can be used as free standing unit or in installations as well as systems designed according to "The modular approach". PSC-series can be used in installation without further EMC tests, if our installation instructions are followed.

Please note that product standards can demand different levels or other basic standard tests. We test according to levels below. For higher levels or other tests, contact factory.

SAFETY STANDARD EN/IEC 60950

ISOLATION TESTABLE LEVELS	TEST VOLTAGE
Input / Output	2.5 kVa.c. / 4 kVd.c.
Input / Case	2.5 kVa.c. / 4 kVd.c.
Output / Case all outputs	2 kVd.c.
ISOLATION TESTABLE LEVELS	SAFETY ISOLATION
Transformer isolation In / Out	4 kVa.c. / 8 mm

We use the product standard Low voltage power supplies, DC outputs EN IEC 61204-3.

The EMC level follows the generic EMC standards:

EN IEC 61000-6-2 (Immunity)

EN IEC 61000-6-3 (Emission)
