X-axis zoom source-sink @low voltage

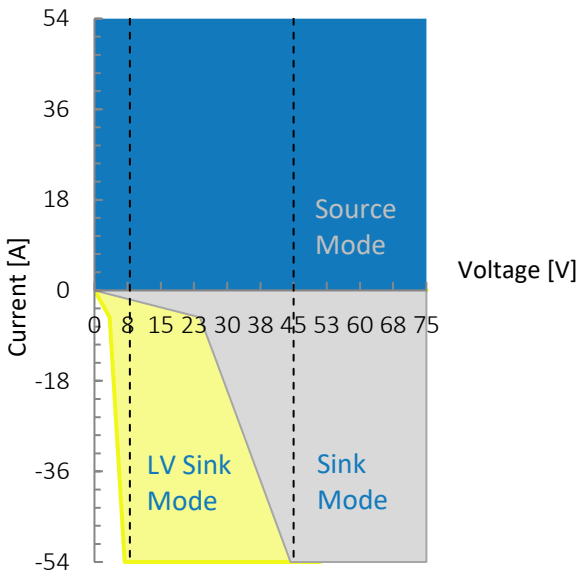

Figure 2: Normal sink mode in grey area down to 23(45) V.
To use the LV Sink mode (yellow area), the upper voltage limit has to be lowered,
- to 30 V for sink down to 3(8) V (yellow area)
- to 498 V or higher for sink down to 23(45) V (grey area)
- any other value between 30 V and 498 V
  will lead to a minimum sink voltage between 3(8) V and 23(45) V.
