Standard Features

Bi-Directional Two-Quadrant Output

Full-power bidirectional two-quadrant operation keeps the DC output voltage constant whether power is sourced or sunk. Ideal for PWM-controlled DC motors and ATE systems.

Digital CV- and CC-Settings

Long-life digital encoders on the front panel provide precise CV/CC setting with coarse/fine adjustment and full front-panel lock (including CV/CC knobs).

High Voltage Isolation

A high DC output isolation allows floating operation up to 1000 V for all types.

Sequencer

Arbitrary Waveform generator or standalone automation.

Ethernet Interface

Ethernet interface for programming and monitoring (SCPI), including an integrated web interface for remote control.

USB-Input

Feature not yet available. Front and rear USB inputs (Host / Type-A) are planned for exchanging settings and waveforms. Sequences can be uploaded via the web interface.

Interfaces
